## **Notebook 5 – Alternative money's, a premeditated design of trans-dimensional STS entities ?**

In these dark times that mark the transition from one humanity toward another an impressive number of alternative money types are appearing nearly “miraculously” on French territory and probably in other countries too. Understandably this sudden craze for these new currencies set the alarm bells ringing for us.

We ourselves encourage one of them on the LEO network and moreover it is the only one ! This is the J.E.U. (Jardin d’Echange Universel translated as “Universal Garden of Exchange in English”) that we discovered at Parisot ([video discussions available in French](#)).

Without going into details, for you can find out more on our site, the J.E.U. distinguishes itself from other systems of exchange that have been put in place for the simple and good reason that its basic principle reposes on the total autonomy and transparence between the players.

This process of exchange is apparently unique because to our knowledge, it is the only one that is not under the supervision of a centralized accounting institution, contrary to the other alternative systems that are flourishing everywhere in France.

The J.E.U is already present in Aude (our region of residence) but for the moment it has not met with great success. Other alternative currencies have already overtaken it and we are going to understand the reason for this.

The J.E.U. having been inspired by the practice of exchange in ancient “Atlantian” Egypt (a civilization that had never installed a system of exchange in the form of money), was essentially based on a written procedure (exactly like the J.E.U) and made reference to a system of values that leaned on the creativity and appreciation of every one. The unit of account in this system establishing the value between the merchandises, was the “shât”.

<http://www.nbbmuseum.be/fr/2012/05/nederlands-geldgebruik-in-het-oude-egypte.htm>

This philosophy of bargaining therefore resembled more the “bartering of worth” rather than the existence of concrete money merchandise. In this civilization, money as such was strictly speaking unknown and did not know speculation (interest, banking, credit, profit...)

Moreover this would explain why the J.E.U. (coming from our trans-dimensional memories) is having such a hard time emerging. Its principle, issued from the 5<sup>th</sup> dimension of STO consciousness, remains a foreign concept to current human consciousness.

Is it not precisely this distortion of the value of “the art of the people<sup>1</sup>” that permitted the Money god, the “Monetary<sup>2</sup>” god to reign and destroy (keep silent<sup>3</sup>) our civilization ?

These other emerging currencies with more than approximately 40 versions in France, such as the SEL, the Stück, the Eusko, the Roue, the Radis and soon the SouRiant, should become compatible with the future “official” alternative French money called the

---

<sup>1</sup> TN “Money” in French is “argent” and in the language of the goslings, “ar-gent” can be read as “art des gens”, meaning in english “art of the people”.

<sup>2</sup> TN can be heard as “mone-tarry” or “moan-tarry” implying that the god of money keeps us moaning and waiting.

<sup>3</sup> TN In french, « monétaire » can be heard as « Monnaie-taire », « taire » means « hush ». In the language of the goslings this can be interpreted as money-silence. Money “silences” people and keeps them complacent.

Coopeck. The latter, a creation of Biocoop in partnership with the allegedly ethical Credit Cooperative and NEF, is even destined to be transformed into numeric money. Such progress !!!

So let us open our spirit and ask ourselves a question that seems fundamental. Why is there this sudden popularity for alternative money's ? What is this hiding ?

**A question in dialogue with our “inner self”:**

**Is this increase in power of the alternative money's, concealing something from us ?**

Here is what we have received in response.

Humanity has slid into a decisive phase of the transition process toward superior dimensions of density. It has entered into what the ancient traditions have called the 1000 years of Satan or the realm of one thousand years of peace.

Moreover the response is coded in the “ancient sacred texts”:

*– Satan, who is at the origin of all evil, the adversary and the opponent of God, is seized and thrown into the abyss. “And I saw an angel descending from heaven with the key of the abyss and a great chain in his hand. And he seized the dragon, the ancient serpent that is the devil and Satan, chained him for 1000 years, threw him into the abyss, and locked him up; and he put a seal on him in order that he would not seduce the nations, until the 1000 years were accomplished; after which he would have to be unchained for a time” (Apoc. 20.1-3).*

<http://www.missionfoibiblique.net/efapregne1000ans.htm>

This symbolic passage of the apocalypse is very airtight because the crowds never ask themselves the nonetheless crucially important question on the identity of this “Angel” who chained Satan for one thousand years.

Because neither God nor Christ would fail the law of ONE, would it not rather be the light-bearer Lucifer (the anti-Christ, the false light) who in imprisoning Satan (the darkness) proposed himself as the savior of humanity ?

Therefore, would the emergence of alternative currencies not be a luciferian alternative to replacing the official money, with the sole aim of distancing you from the path in Service of the Other by deviating you from your own legitimate creator power ?

Can you see what I am trying to bring across ?

Lucifer is he who submits man, the “son of the creator”, to “temptation”. He can therefore neither be Satan nor Christ. Religions have intentionally merged the two polarities (STS-/STS+) into one in order to maintain confusion. This is yet another one of these “religious” tactics of the predator corpus.

The one thousand years simply correspond to a defined period of time in which each one is called to establish his STS or STO choice in view of his subsequent cycle in 4th density.

This choice of temptation that Lucifer proposes to man, can therefore be summarized as follows:

– following the experimentation of the Service to Self world, which is the matrix of a material world, that’s to say a 3<sup>rd</sup> dimension densified, a “hell” ruled by the reptilian Demons of the Golden Age...

– or else climbing up the levels of Consciousness, follow the path of Knowledge and of Service to the Other, in proposing the difficult path of the cross of Christ to the soul, culminating in a dimension of a more elevated density: the 4th density of STO existence.

It is important to emphasize here that it is no longer about speaking of dimensions but rather the progression to the 4th density of existence with all the psychic, physical, and energetic disturbances that this implies !

Coming back to the subject that interests us today, the days of the Euro, the Dollar and the other official moneys are indeed counted because similarly their collapse is well and truly scheduled.

But what everyone ignores is that the emergence of alternative money's is also carefully programmed, perfectly controlled and orchestrated by the luciferian STS+ forces, who by subterfuge, not only propose to elevate themselves as benefactors of humanity, but above all as saviors of an obsolete system of exchange !

As you have certainly already understood, humanity has arrived at the last straight line before the grand finale. On this subject, the climatic changes in process show this amply.

<https://www.youtube.com/watch?v=13sz1SdzTJk>

Just as the New Age would become the traditional religion, in the same way the alternative moneys would henceforth become the official moneys. It will therefore be nothing more than the New Age of economy and the new locks of a golden prison. Or if you prefer, an "alternative" system of control of the spirit that is supposedly more ethical, which will nevertheless hold the authority in the beginning of this new cycle of the New Golden Age...

And evidently, this operation of the replacement of the traditional monetary system by its alternative is always finely orchestrated by the secret governmental agencies, obedient to the "luciferian" plan of the 4<sup>th</sup> density STS entities.

Indeed it seems that the 'cabal' is losing its speed but this is just one more lie, because the 4<sup>th</sup> density entities are not the cabal. The latter exist under at least 5 different principle groups that control the world and they control it like a vulgar puppet show.

It is therefore in question to understand that the 4<sup>th</sup> density STS entities that are situated in a dimension of no-time (past and future confused), ensures that the human does not manage to attain the 4<sup>th</sup> STO density or only manages to do so with great difficulty. It is their role, their perpetual combat and their reason for living, and they will put everything in place to prevent the human from doing so. They continually find all possible and unimaginable strategies to keep him busy and make him forget the true reason of his incarnation on earth at this end of cycle that can be summarized as a preparation of his whole Mind-Body-Soul to migrate to 4<sup>th</sup> density.

You could therefore understand that investing body and soul in the organization and the functioning of alternative currencies is a pure loss of time and energy. You must not let

yourself be distracted by a new illusion. **You must firmly preserve your energy and amplify it for your transition !**

Also, if you have a tendency to forget, re-examine your “karmic past”. It will be very useful if you do not want to repeat the same lessons. You will find extremely pertinent clues there but like each and every person, you are always free to give the experience a try and continue experimenting the illusive cycle of money-energy.

*(On this subject, the témoignage d’Hélène « Les enJEUX énergétiques », is equally very interesting.)*

Promptly, the responses of our In-I (=Angel) and certain synchronicities oriented us in particular to a site communicating on the subject of alternative money’s in Aude. We were not hugely surprised to discover that all our old “false friends” of Bézu and the Haute vallée, as well as the clique of “guru’s and cock channels” from a few years ago had obviously created their own “organic bird-catching ethic”. *(See l’appel du pays Cathare)*

And it is precisely them who are the initiators of the SouRiant, another alternative money system of the matrix. Is this a coincidence ? Surely not !

In consequence we have found the response to our questioning. Without any doubt, revisiting our karmic past showed to be very revealing because at the same time that we perceived the profound inner change resulting in our new site, the predator corpus seemed to have also switched to high gear.

We know that all our old “friends” have chosen. They will very probably persist in a cycle of Service to Self. Our quest and our objectives being of an entirely different nature have brought us to understand why our roads have separated.

Like all individuals attached to a path of “Service to Self-STS” consciousness, they would not and could not understand. Even in believing themselves to be engaged on a spiritual path, they are finally only doing this to use the famous “pseudo” law of attraction, in order to satisfy their ego-SELF. In reality, they are only preserving the honor of the Money god in order that they can stay persuaded that this will make them rich, happy and free of all torment.

In the same way, by forbidding themselves to take the path in Service of the Other in order to become creator of their reality in another dimension of existence, they have obviously fallen into the ambush that Lucifer has set for them. The same trap related in the writings, in which Christ was tempted by the demon.

And this is why all our old friends abdicated... They did not believe in the ruses of Satan. Closing their eyes so that the soul could not see was simply their choice. This option has become the path of evolution today for most humans.

The STO path is very difficult to determine, precisely because it is not “human” and as Yeshua claimed, it is not of our World.

**Indeed, the path of Christ consists of proposing our energy for example in the form of information, which must be proposed knowingly to the other, in full consciousness of the law of cause and effect. But the path of knowledge teaches us to never let it be stolen from us.**

On the path in Service of the Other, the process of energy exchange therefore requires the highest level of vigilance. Because when we allow ourselves to have our energy “stolen” by inadvertence or ignorance, we allow ourselves irremediably to be taken under the hold of the predator and we stay trapped by the psychic power of the STS corpus.

In the same way, due to the reason of the underlying, profoundly repressed, and completely unconscious “fear of lacking”, he who sells or asks money for this knowledge (information energy), finds himself mechanically, by the law of retro-causality or “cause and effect”, forced to “reimburse”, in order to rebalance the energy put in circulation.

*(This law is illustrated in ["l'histoire des chaussures de Sand diag. N°25"](#))*

Whereas if we offer it, put it at disposition or propose it **without expecting compensation**, it will be returned in one manner or another through the law of cause and effect, but in a natural way. **For energy/information remains permanently and freely in circulation in the universe. This is why it's called “free energy”**. It circulates perpetually and in this way represents quite simply “weak nuclear force”.

While money, energy densified by any form of power in the form of a flux (control, dispense, restriction, demand...) corresponds to strong nuclear force.

If we try in one way or another to control this flux, by for example densifying it with our belief systems in the form of money, **our attitude falls unquestionably and automatically under the Service of the Self.**

This being said the individual under the hold of 4th density STS entities, as is indeed the immense majority of humanity, is not “equipped intellectually” to “understand” the true notion of Service to the Other.

The STO principle, which is “practically innate” to the “bearers of the mark of Cain” of primordial humanity, stay absolutely impenetrable for the predator entities that govern the human spirit. This is notably verifiable during the abduction phenomenons.

Thus, conditioned to trick to steal, take away, rob..., proposing our energy inevitably destabilizes the predator. For the latter on acting in the invisible, is not used to being recognized and even less seen ! The reptilians and the “negative” grays for example, are extremely disturbed when the abductee wakes up for a moment in the rapture and resists. They are even more so, when without being afraid, the individual attempts to enter into contact with them.

We are simply speaking of our own experiences (above all those of Sand, [conf. Diag. n°37](#)). What happened since has been greatly revealing.

Our awareness has been extremely redeeming and completely reversed the negative perception that we had of the predator world. It is among other things, through our interactions with their dimension that we have understood that these entities could become our teachers.

It is thus that Lucifer, bearer of light-information, proposes a choice to us: that of opening ourselves to the experience and to information that he carries by overcoming our fears, or

otherwise that of rejecting this information, which in this case will transform him into a demon (satan). This is simply because we ourselves would not be open to Knowledge.

### The Angel continues:

The same universal principle operates when money in circulation is concerned. If you are afraid of lacking money or if you are afraid that the methods of money exchange disappear, this fear is not your own but that of the predator who sneaks into your thoughts.

If he was not under the influence of the fear generated by his own predator, the human as a fractal of the primordial creator Spirit would not even worry about the flow of money.

So the more you follow the path of "Service of the Other-STO", the more your attraction to money and material possessions disappears. For in the deepest part of yourself, you know that money, even alternative currencies are only lures that bring you without doubt, back into the reptilian matrix.

The predator, in realizing that his means of subsistence is disintegrating, will do everything possible to find a substitute. It is in this way that the Service to Self corpus responding to its own fears, invents a fantastic alternative to money ! A substitutional currency that in order to reassure the illusion, is finally only proposing itself as a simple alternative to this same matrix !

To remember, the entities of the 4<sup>th</sup> density predator corpus have absolutely nothing humane, but they are incredible illusionists and skillful manipulators of the human psyche.

And of course, it is about acknowledging that the principle of an alternative currency whatever it may be, is nothing less than another alternative to the mark of the beast, but a mark it is nevertheless and a Machiavellian lure.

*– Apocalypse 13-18. It also forced all people, great and small, rich and poor, free and slave, to receive a mark on their right hands or on their foreheads, so that they could not buy or sell unless they had the mark, the name of the beast or the*

*number of its name. Here is the wisdom. May the one who has insight calculate the number of the beast. For it is the number of man and that number is 666.*

This being said, the J.E.U as it does not possess any governing pyramidal structure, would still be of lesser harm. Being that the human society is for the moment still under the influence of an egregor of STS consciousness, the J.E.U could “function” during the time of transition for interested late-comers for those who believe they still need it.

Prosperity, as we have already said, is under no circumstances related to any sort of money flow, whether this be official money or an alternative money.

Nevertheless, the J.E.U, in throwing light on the responsibility and honesty of each one, would constitute by itself, a first step for he who steps forward to experiment a facet of Service to the other, but under no circumstance would it constitute any kind of culmination.

*Sand & Jenaël*
