

Chronicle n°23**The invaders: has the final wave landed through Ukraine?****&****When true information will transform the world!**

We are about to live the final jolts of “ordinary human” history. Whoever has eyes to see can now see it! The closure of its cycle will turn out to be very different from that imagined by all those people enduring the series of great catastrophes, ecological disasters, economic crisis and wars. But it will indeed be the one that only a few informed individuals, awakened people on the planet, had foreseen. We have known it for some time now, something unprecedented is happening in the “mirror universe” of our solar system. We announced it earlier!

Then, what is it about?

While the spotlight is on the conflict in Ukraine, the “overall plan” of the New World Order seems to be following its path. Whereas the ruling psychopaths were working to drive the human herd crazy by the viral pandemic in Europe, others have invented pretexts for them to kill each other through this last war. However, let’s be clear, all these doom and gloom scenarios only exist to hide the existence of a completely different danger which threatens the ordinary human. Since beyond the possibility that the planet gets hit again by a large asteroid, another danger, even worse, is on the lookout.

Indeed, repeating itself every 3600 years, a conflict of alien origin, projected for several decades through these much-vaunted transdimensional portals opening into our current reality, has recently been transformed into a genetic war, a real open conflict between different human races endowed with a “Semitic/angelic” DNA (of “Christlike red blood”), and other emissary lineages of dark alien forces directing all of the Nazi operations on Earth (of royal blue blood).

Now, these hyperdimensional and trans-density wars spreading between the different worlds of the Service to Self henceforth involve those of the Service to Others. Since they are reinforced by a genocidal agenda consisting in transforming man's consciousness, and therefore his legitimate gravitational environment, through the emergence of quantum machines connected to artificial intelligence and to the virtual world. This agenda aims at subjecting, to an unprecedented level on Earth, humanity intelligence to the omnipotence of technology, at the expense of that of the soul and spirit of the individual.

Thus, while the Eastern and Western units are refining their scenario in order to ignite Europe, the Nephilim/Nephalim/Anunnaki, these aliens, who are still little-known or even completely ignored, discredited by ordinary humans, have entered the fray. And probably even that other peoples, still unknown to ordinary humans, will soon emerge from underground cities through the bowels of the Earth, in order to participate in this great battle for the planet's domination.

These Nephalim/Anunnaki swarms, activated as groups of psychic predators, henceforth use systemic flaws, meticulously prepared and placed within the political, military, and matrix-like systems in order to provoke the "Great Reset", a new big bang for planet Earth. In other words, these entities will still benefit for some time from our society's collapse, well and truly planned thanks to the complicity of Western media, chaining up the lies so to offer a semblance of peace! This, on condition that people accept to carry the ultimate signature of this renowned "666, the Mark of the Beast", the finished program of marking by repeated graphene vaccinal injections, a carbon allotrope consisting of 6 electrons, 6 protons and 6 neutrons! Eugenics-based program soon completed that will not be long in revealing its doom and gloom consequences.

<https://unfuturdifferent.jimdofree.com/chronique-18-sand-jenael/>

Consequently, the STS corpus of 3rd and 4th densities, thus supported by incorrect information gathered by the "civil and military intelligence" community, will establish its authority over the ordinary 3rd density humanity, which got itself deceived by its ignorance.

The Cassiopaeans had taught "Knowledge protects, ignorance endangers"!

At some point in this final war, when fear and chaos will reach their peak, a so-called "new moral authority" driven by quantum artificial intelligence, itself led by elements of the STS corpus of 4th density, will address the deepest impulses, frustrations and fears of

the individual, with the aim of suggesting a program out of their usual rational consciousness field, in order to offer them to restore a new planetary order.

This authority of the Service to Self of a “rather positive attitude”, known under the denomination of “the Alliance”, will appear to put an end to the fight against the occult forces that raged on Earth. It will also reveal itself as the White Dragon Society and White Hat, tasked with “chasing all the villains”, restoring prosperity and establishing peace. And tired of all these lies and conflicts between the nations, ordinary humans will then willingly participate in a new global economic system established by this famous “Alliance”. The matrix-like system will then be completely changed and will trap the “new ordinary humanity” within a new cycle: the Golden Age of 3rd density.

Then, let’s guess what comes next!

Alongside this “scheduled end”, thanks to the inner work and their very intensive search for Knowledge, certain groups of individuals constituted in tribal unit will have managed to incorporate higher resonance frequencies and will begin to build up spiritual bodies. They will therefore not have needed the “Alliance” to change of density of reality! In other words, they will be gifted, little by little, of more ethereal corporal extensions, this means of bodies endowed with a variable physicality, less dense and better adapted to their passing in 4th density, and will therefore be “naturally” transposed into an alternative reality, this means their new world, thanks to their atomically higher frequencies.

With this new type of body, vibrating at more ethereal frequencies, they will be just as capable of continuing to explore the “atomically more ethereal” worlds, as of returning in an “atomically more material” reality dimension and leaving it as they wish. They will therefore be gifted of the same faculties as all those beings – even human hybrids – who are already inhabiting the worlds of 4th density.

This complex and extraordinary process, completely inconceivable for the ordinary human, has begun with the occurrence in the cosmos of the Dark Star, predicted amongst others in these words:

2.41 The great star for seven days will burn,
The cloud will make two suns appear:
The great mastiff will howl all night,
When the great pontiff will change his country.
(Nostradamus 1555)

https://www.bonjourpoesie.fr/vospoemes/Poemes/alexander_kiriyatskiy/241_pendant_sept_jours_la_grande_etoile_brulera_n-mus
<https://newprophecy.weebly.com>

Like a robber in the night, this stellar body, twin of our current Sun which, completely invisible, already “prowls” in our solar system, would achieve the alchemical process of current humanity! This brown dwarf whose occurrence had been widely revealed through different prophecies under various names such as the Dark Star, Nibiru, Herboculus, Nemesis, Marduk, Sedna, planet X..., only emitting infrared radiations, has nevertheless been identified by certain astronomers, but its existence has not yet been officially revealed to humanity!

However, religious writings, for example in the Louis Segond version of the Bible, reveal its coming:

[2 Peter 3:10](#) But the day of the Lord will come like a thief. The heavens will disappear with a roar; the elements will be destroyed by fire, and the earth and everything done in it will be laid bare.

[Revelation 21:1](#) Then I saw a new heaven and a new earth, for the first heaven and the first earth had passed away, and there was no longer any sea.

The elements that we communicate here therefore stem from the study of biblical prophecies and other omens that men or women had established before they plunged into our world. These prophecies were written so that they could remember their soul mission. They therefore are part of their birth visions that announced the end of this modern and technological world and will soon turn out to have been quite precise about our era. Unveiled and transmitted to mediums by STS beings that always reveal their plans in a hidden way, we hence guess the direction that Russia will have to take, then the world, during the next three years.

Channelled and revealed for example by Marie-Julie Jahenny de La Fraudais (<https://archipaladin.fr/tag/la-fraudais/>), we now discover the scheme of this wonderful “invasion of psychic aliens” disguised as Nazi militaries or as refugees amongst the Ukrainians, which has to run through Western Europe, from Russia to France. Most likely, this invasion has even already continued to other stargates, like the one opened by the CERN in Geneva which, in 2015, had “apparently” succeeded in launching its

“hyperdimensional/spiritual” project of “unloading/downloading” of a first Nephilim contingent. (Cf. Chronicle 22: <https://unfuturdifferent.jimdofree.com/traductions/anglais/>)

Hidden under pretexts of maintenance, consolidation and improvement works, this institute would have also been the theatre of secret battles, involving “international” military forces against these entities which, during Barack Obama’s presidency, showed up through this stargate, hence investing the psyche of some of the “psychopaths” of the CERN.

The world’s largest particle accelerator having a statue of Shiva given by India as emblem, officially restarted on the 22nd of April 2022 at 12:16 after a pause of more than three years, revealed its mainstream media.

<https://home.cern/fr/news/news/accelerators/large-hadron-collider-restarts>

This pause will soon prove to have been a big cleansing by the militaries of the Alliance. Other dimensional portals, like that of the Vatican in Rome, the Capitol in the United-States..., have also been “cleaned” by these “military avengers”.

While waiting for the total overthrow of the 3rd density paradigm, most of the “leaders in power” of these big firms or institutions have been replaced by clones, so that the ignorant public continues to believe in their legitimacy and is not too “injured” by all these truths which will start to emerge.

Mediums like Marie-Julie de La Fraudais had foreseen that:

“The three last years will be in Italy just as in France: they will hardly leave anyone standing on this ground.” https://www.youtube.com/watch?v=2NQu9-LbO2o&ab_channel=Margaret

This multi-variable scenario will therefore have to accomplish until the end the Great Work supported by the plan intended to impose a world state which will indeed emerge, but not in the way the globalists have planned it. The shortages that are already appearing and the starvations which will follow are hence part of the prophesied elements linked to the defeat of the “govern-liars”¹ and their consortium of humans, followers and accomplices.

¹ ‘Govern-liars’ is the translation for ‘gouvernementeurs’. The latter being a portmanteau word to designate the lying people who are in charge of the government.

In the meantime, other downloading gates have opened and will still open elsewhere. Disasters will occur and will not only destroy the Western economy, but will be meant to affect the entire world. Starvations which are taking shape with the announced cereal deficits, more specifically of wheat, will also help to awaken and ignite the Maghreb then Sub-Saharan Africa and the Middle-East.

We therefore have to understand that all these scourges are necessary disruptions, therefore intended and programmed at this end of time by the higher planes, in order to establish a great change, a sort of revolution in the universal matrix.

It is said:

“In those days, the world and hell will have drained all their rage. It is shortly before waiting for the hour that will mark France’s overthrow and its fatal punishment, or rather, to explain myself correctly, said the voice, the hour of this grand universal revolution. The beginning will first be released in France: the latter will be the first to walk towards the abyss and resurrection as well.”

Marie-Julie de La Fraudais (9th of May 1882) – <https://www.brujitafr.fr/2018/04/la-destruction-de-paris.html>

By objectively analyzing the essence of these prophecies which we know well to have been delivered by the STS corpus for the ordinary human, there would therefore well and truly exist two distinct futures opening up ahead each of us.

We can choose to give in to fear, to believe that the world has to come under the control of the totalitarian States established on automation, artificial intelligence, social decay and final destruction. What will unfortunately be the future reality already mapped out for ordinary humans not questioning themselves that much about the reality of their world. However, we can also follow another path, consider ourselves as savvy people and defeat man’s pessimism in order to open ourselves to the higher resonance frequencies of truth, love and Knowledge. And for us to be able to enter into a new dimension of existence in which we would encourage our inner soul/spirit forces to create exactly the new reality of the vision we had, the temporal line of the “end of the world” would therefore be spared us.

Question to the Angel:

What would be the reasons for such a mendacious harassment by the media and politicians of Europe and United States towards Russia?

What we are now revealing should be heard by as many people as possible. In 3rd density, the exponentially growing combination of intolerance, hatred, cruelty, jealousy, that is to say psychopathic behaviors associated with pessimism and individual fears, supplies

power to a growing egregore of beliefs, unfortunately endangering the whole biosphere of human species.

These collective thought-forms, specific to humans of the Service to the Self forming a thought centre of ordinary STS humans, act on the etheric grid of the Earth; namely the geometric frame of its planetary consciousness. This energy matrix reactivates on its own the four physical elements of the planet (earth, air, water and fire), and finally accelerates climate chaos and environmental change.

Now, the still ignorant individual should start understanding that everything is linked. Ideas and beliefs they project in thought, the planet (the plane where you are²) takes care of realizing them. Most of the Russian scientists have already understood that human emotional chaos is extremely disruptive to the Earth, which is reacting more and more violently to this saturation. This information, which would absolutely require to be brought to the attention of the populations, should trigger a radical change in all the man's behaviors towards their planet. But the Deep State in Europe, like in the United States, led by the hyperdimensional alien predators, does not accept that such secrets can be revealed. This "ancient Knowledge" has therefore always been hidden from ordinary human for purposes of domination.

However, a large number of revelations have been made in recent years by figures from the Alliance and its military community, including Russian top brass officers. Groups of American and European researchers are only beginning to disclose this kind of information through alternative media which, at the same time, have been accused of conspiracy by the Deep State governance. But it must be understood that amongst all these conspiracies, some leakage has been authorized by higher influences, so that man can still detect some universal truths.

In addition, communication about the existence of these hyperdimensional influences and realities remains shy and cautious, especially in Europe. Its mass media coverage therefore remains very low, if any, in a country like France.

The fact that some of these revelations already exist may want to announce the "famous disclosure of alien presence on Earth" that many have been waiting for, and for which a huge amount of people have been campaigning for more than fifty years. But also understand that its everlasting "postponement until tomorrow" can still be used to manipulate the puppet masters of your world in order to maintain control in new circumstances. These circumstances in which major events such as the opening of other time and dimensional portals will occur, will ensure that even the military most sophisticated weapons will be powerless.

² In french language of the goslings, the word « planète » can be divided in « the plane » and « êtes » which is the verb « to be » ; so « planet = the plane where you are »

Also, during the Cold War, Russian scientists gave great importance to the study of the paranormal field and hyperdimensional civilizations. These researchers and soldiers have made important discoveries about the planet's energy grid and concerning the presence around the Earth of a psychic energy field experiencing an expansion of its energy in the form of geometric patterns.

They also discovered that this kind of psychic energy ring, in which the planet bathes, is an energy field in which are contained "sorts of memory records", concerning all life forms and the history of planet. They were even able to determine that the geology of the continents, with its mountainous structures loaded with silicon crystal, perfectly fitted the energy blueprints of this grid. This is how all the structures of what the human recognizes as the physical universe, take form according to well-defined patterns. These structures are sometimes reproduced in crop circles.

The military knows now that this psychic energy field is not on a physical plane, since army scientists have been able to detect and read this energy band by means of various technologies, using the instructions of mediums who are trained to do so.

According to Russian scientists, this energy field would be formed of a sort of etheric/ plasma tissue loaded with emotional energy. This discovery was "hijacked" by the globalists and used to bring about the current Great Reset, in order to anticipate humanity's natural great transition towards a higher level which, despite everything, humankind is already experiencing.

The matrix controllers were therefore aware that in order to rule the planet, they needed to control your passions, since every human being has the power of affecting this field positively or negatively. Consequently, all the negativity expressed through this war in Ukraine, like hatred and fear, has a direct impact on the state of the planet, since the latter violently reacts to your thoughts and feelings. Everything people think, feel and realize, simply affects the spirit of the Earth.

Negative charges coming from the whole humanity are actually way more powerful than nuclear energy itself. Like a diseased body, the planet reacts with natural antibodies to treat the contamination generated by its human psychic parasites.

Environmental degradation is thus not solely attributable to the consumption of industrial and residual energies, resulting from human life. But the human psyche itself is an

important source of pollution, since the Earth responds to its fear, its hatred, as much as it can respond to love and truth.

The planet itself emits a sort of “psychic radiation” that is reflected through its climate models. Water, fire, air and earth then become elements comparable to planetary antibodies. For the planetary consciousness, floods, tsunamis, fires, explosions, winds, storms and finally volcanic flows and landslides, are a way to get rid of the human emotional, that keeps it trapped in 3rd density. The so violent climate change that is actually occurring is then part of a huge process that falls within a perfect cosmic order.

<https://www.sott.net/article/467468-SOTT-Earth-Changes-Summary-April-2022-Extreme-Weather-Planetary-Upheaval-Meteor-Fireballs>

Some scientists have clearly understood that planet Earth is facing an inevitable cyclic process that is absolutely not man’s responsibility or fault. But the alien STS corpus controlling the military corpus, takes advantage of this knowledge to try to trap your world in 3rd density, by simply continuing to trigger human’s negative emotional and their warrior behaviors in response to this emotional. So the Russians have a good lead on the rest of the world in this area of research, since their Semitic genes have something to do with it.

Moreover, some Russian mediums have “found themselves” on astral etheric planes (thus not physical) in the presence of Americans working in the military field, which in reality were for many these Nephilim beings of 4th density. By means of very specific exercises that we will not unveil, these mediums have been able to identify on the surface of your planet, large mind-altering areas produced by electron radiations coming from the mental power of these famous Nephilim. These mediums have thus perceived very dense and very negative dark fields of energy matching these areas of alteration, and enveloping some parts of the globe. These dark zones were mainly localized in Europe, Israel and the surrounding area, as well as in the United States.

Russian scientists also observed that by using some mind control frequencies, not only it was possible to influence the course of life, but also to alter the climate. In addition, through advanced studies on antigravity, they have been brought to extraordinary discoveries on scalar fields ([https://en.wikipedia.org/wiki/Scalar field](https://en.wikipedia.org/wiki/Scalar_field)), vector and non-vector energy, and vacuum.

In the light of all these discoveries, they were able to conclude that major and gravitational climate changes will shortly force humanity to radically change the way it conceived its civilization. They were able to determine that the cyclical paradigm shifts are a reality, and that humanity had therefore entered a period of great upheavals of the terrestrial ecosystem.

But the most important is that the upcoming events that represent a major challenge for humanity, should be seen as the only opportunity for the entire world to decide that the

old forms of power exploitation should be replaced by others, renewable and non-polluting, which obviously are already in the pipeline. This is the vision of the Russian scientists, but absolutely not that of the globalist capitalists who only think about gaining more power and making more and more money.

Question to the Angel:

What would be the main changes that would affect this new human society?

Before being able to answer, you first must “remember” that human beings at the Service to Others have already inhabited Earth in 3rd density, before the colonization of the planet Earth by the Nephilim/Anunnaki predators. Their lifestyle was therefore not so distant from yours today.

The following explanations will thus only concern the population of the STO-oriented New Earth of 3rd density, which will re-emerge after the annihilation of the STS world by the “gods of the past”. But for the moment, the ancient STS world will have to continue for a while, led by an increasingly rigid, automated, monitored, supervised system, and ruled by an artificial intelligence devoid of humanity.

And according to the speed with which individuals of 3rd density will learn to move resolutely towards a new paradigm of altruistic collectivity, or will remain clutched to their previous egoistic mechanisms, a harmonious and balanced society will be built more or less quickly. However, you now know that those who will use their knowledge, won't be affected anymore by the matrix system.

Also, after the collapse of the robotic technological industrial era, and as a result of the shortages organized through glitches in computer systems, a new economic organization will potentially rise on new basis of communication and networking. This reorganization of social reality will establish a new system of data transmission and free exchange of information.

This is why this STO new civilization, still holding memories of its STS ancient culture that is intended to rise again in 3rd density, will be brought to develop, from the simple sharing of social and economic information to the exchange of spiritual truths directly synchronized and collected in the information field. Art and culture will thus be honored in every country, and openness to xenophilia and diversity in all fields will be vigorously promoted. At the societal level, that is to say with regard to human community, people who will have a part to play in the process of decision-making will have to be way more demanding with themselves, just as they will have to be more demanding with their representatives. As a result, the centralization into a pyramidal global government, such as it was organized in 3rd density STS, will turn into a completely decentralized system that will respect the cultural progression of peoples.

The old version of the STS “democratic” system in which citizens were supposed to take part in public decisions and political life of the country, had for a long time no basis, no reality. Since Nephilim entities were hidden amongst your elected and completely corrupt elites, and had taken over their psyche and intelligence. Consequently, the State’s main institutions of power were riddled even in their facilities and foundations.

However, in this new STO 3rd density, “computer networking” will gain popularity, since all the citizens of the future communities will liaise, not to argue about their opinions anymore, but to share their information and resources. Consequently, the society of tomorrow will be way less structured than in the past and its red tape, almost non-existent. It will also be heavily linked by a completely open, non-corruptible and non-corrupt computer system, in which each individual will be able to share their ideas, their personal ethics while respecting that of the other.

Thus, it will also mean that each individual, will be offered numerous options of life experiences with different potentials of achievement that they can pursue. Whereas in the ancient world, they could usually only try one or two of these options.

In the ancient STS world, the main strategic resource was money, capital. On the New Earth of 3rd density STO, the main strategic resource will be the sharing of information, since Knowledge can rise through the experience of each person, amplified by synergy and combined to generate a result that is superior to the sum of “individual knowledge”.

The new humanity of 3rd density to the Service to Others is on the verge of a huge revolution in communication technology. It will see the growth of a single global information system allowing real multidirectional interactions on a global scale.

The transition from your industrial society to an information society does absolutely not mean that industrial production will cease to be important. On the contrary, the emphasis of change will shift from physical functions to more intellectual ones, on which will rely the whole new physical reality.

Thus, in this new world of 3rd density, information will become an economic entity, because it will be extremely valuable and because some people will be willing to exchange information in order to obtain that of the others.

Finally, the New Earth of 3rd density STO will be organized around the sharing of information and will orientate the individual to redevelop the growth and the development of their brain through their education and learning. They will therefore become more intelligent, but also more intuitive, more imaginative and finally more creative.

“The productivity of a know-how” had already become the key to productivity in the old world of 3rd density. It will now be the “competitive” strength of the know-being, that will ratify that of the success of the new 3rd density civilization!

Question to the Angel:

There are many pictures on the Internet which show a second sun close to the current one. Are they real depictions of this brown dwarf, the Sun’s twin?

No! They are sometimes atmospheric reflections, but most often they are images retouched using software, since a brown dwarf only emits a low infrared radiation, thus no visible light. It therefore remains imperceptible to human eyes.

A second sun photographed on April 14th, 2017
LaPresseGalactique.org

Incredible in the Sky: Two suns observed in the
Slovak sky...

A second sun – Eureka – Télé 2 semaines

Question to the Angel:

What are the consequences of the appearance of this brown dwarf within our solar system?

There will be a very distinct frequency separation between the time line of ordinary humanity, let’s call it the A line, and the time line of the humans who will have worked their way out of the scheme of their matrix memories, the B line.

This separation will mean that those of the A line will persist in the system that is generally prophesied by mediums and planned in a matrix future already programmed by the New World Order, while those of the B line will be propelled towards a still unknown potential of future, but in the process of being structured at a higher level, thanks to those who will have searched for Knowledge. Thus, those who will have accomplished their inner work will extricate themselves from the entropic matrix system of 3rd density on their own.

The beginning of this mechanism of reality split has started for more than a decade. Thus, the end of the temporal matrix of 3rd density, which is about to occur because of the proximity of this brown dwarf (the cometary swarm), already reveals itself by a succession of gigantic electromagnetic disruptions of energy fields on planet Earth, affecting more

and more the organism and biology of the human, in addition to impacting all its machines and electronic and magnetic technologies.

In these magnetic disturbance periods, the consciousness field of the soul-endowed humans who have chosen the orientation of the Service to Others, is also progressing in stages towards its upper level. While that of the soulless psychopathic individuals is regressing in stages as well, towards even denser lower levels.

Thus, this electromagnetic change progressively affects the reality at the atomic and gravitational level, until a breaking point which will transfer the individual in 4th density. During this process, some individuals and soul groups will reach a vibratory level very close to after-life, without transiting through 5th density. They will thus disappear from the environment and reality, to the eyes and perception of the great majority of people who will have remained in 3rd density. And after the beginning of this ecstatic transfer, knowing that they will soon also leave, Service to Others missioned individuals and soul groups will still accept to inhabit the material dimension, to help the remaining humanity, since that was their role.

While this soul transfer will occur, those who will have freed themselves from the vibratory frequencies of the ancient Earth, will accompany and lead new human lineages towards the frequencies of the New Earth. For this, they will somehow have to transfer their own energy into their new bodies, thus creating a broader, more open dimension of physical and spiritual reality, corresponding then to the B time/consciousness line.

You can now understand that by succeeding in modifying the A time line, your aim was not only to create a New Earth, but also a new paradigm in the after-cycle of 3rd density, in which you will discover all the consequences of your multiple « memories » of worldview. These consequences are potentials of realities now open which, thanks to your inner work, have not only influenced the spiritual dimensions at higher levels, but also the physical dimensions in the higher worlds.

In this post-Atlantis cycle that is ending, some groups of individuals had « preserved » the Knowledge, but since they had exploited and practiced it only at the Service of their own Self and never shared it, they now have to learn from their mistakes. For that purpose, they will reincarnate in a new cycle of 3rd density, until they have integrated the meaning of their betrayal of the universal laws, and understood the suffering they have caused among humans, because of their egotistical behavior.

Therefore, in the various reality dimensions of your world, there permanently was a kind of “galactic conflict”, aimed at the concealment of STS realities or their disclosure, since their revelation would have allowed humanity to be open to realities of STO potential.

Taking advantage of this concealment, beings of 3rd and 4th densities STS corpus were trying to take ownership of your Earth, because in your area of the universe, it has always been a jewel because of all the genetics, forms of life and intelligences which it contained in its worlds.

Humans have thus been caught out by these predatory entities who wanted to take ownership of their planet, since they managed to also take over its energy. Human beings, despoiled of their expertise and this Knowledge through many genetic manipulations suffered from not being able to stay connected to their intuition, guidance and Higher Self.

Now that this end of cycle is getting clearer, high hierarchies of 6th and 7th densities agreed that all this suffering had to stop. Various resources have been dispatched in your solar system to this end. Among them, the atmospheric contamination by cometary viruses coming from the 4th density will have supported the true human genome recovery. But it will also have “temporally” amplified the genetics of Nephilim/Nazis psychopaths, the agents and instruments of the Orion reptilian creatures, so that it can be detected and then neutralized.

However, from now on, everything will be over in a very short time, but prior to that, the dark side of the force will still try to react. Nevertheless, when it will realize it has no more loophole, either will it let itself be transformed by the light of truth and information: Love, or it will be destroyed by the famous black holes and remelted into the Whole. Since by the law of ONE, nothing is wasted, neither energy, nor consciousness.

Planet Earth is an extraordinary laboratory of bio-diversity which not only accumulates the genetic forms of all the species inhabiting your area of the universe, but is also the ideal world for every kind of physical, psychic, spiritual, emotional experiences intended to these forms of life. This Earth, that is so precious for the sequence of short evolution cycles, must not and thus cannot be destroyed by the involutive forces of the Service to Self. Since beyond its role as a laboratory hosting human beings, non-human beings, as well as various kingdoms (mineral, animal and plant), there is also the consciousness proper to the planet Earth.

This huge vibratory energy reserve which is inserted into the system of planetary consciousnesses, singlehandedly represents a power, a kind of center of consciousness and intelligence, combined to the elements, to the Sun and all the planets of the solar system. Including itself in the galactic system, its energy force is such that even with the most advanced technologies, nothing and no one could destroy it.

Question to the Angel:

The Cassiopaeans had confirmed the presence of Nephilim, already at the height of Atlantean civilization. Will our modern civilization also end up like the Atlantis' one?

Your modern civilization is led to disappear as in every end of cycle. Yet, as at each end of long cycle, it will open into a new reality, a new world! And as always, "extraterrestrial" influences will unveil across the world.

Some governments have been warned of the great changes to come. But the modern ordinary human was not intelligent and intuitive enough to take into account all the clues that he was supposed to detect through cinematic fiction works, since most films indeed showed stupid fictions.

However, the human intellect is now reaching a point in evolution where it makes more sense to suggest the existence of a life beyond your world than to question it. Despite this, the great planetary governments which are perfectly aware of the extraterrestrial influence on our civilization, still deny it. And there is a very good reason for that! Because if ordinary humans, who represent almost the entire humanity had the knowledge that these entities possess, including the true history of your planet, the current system of beliefs would collapse like a house of cards, since it is essentially based on psychic and intellectual constructions relying on illusions created by the matrix system of 3rd density. Thus, the control of the belief system, the very power that occult governments hold over the global population, would disappear overnight.

You should then know that your planet, in fact like the rest of the universe, possesses numerous sources of non-polluting energy. To suddenly decide to use it would be to destroy the very foundations of global economy. But continuing to use sources of polluting energy contributed to maintain the entire current system under the dependence of financial empires. However, these energy sources will be proposed to the post humanity, since extraterrestrials and extraneans who respect your free will have very advanced knowledge about what you call free energy. However, not directly involved in human business, some among them have nevertheless proved that they came with good intentions, by showing how, in a few seconds, they neutralized the most advanced terrestrial military technology, if it was used to attack them or harm the planet.

The military nuclear technology is no more operative for a long time now. It is only wielded like a threatening scarecrow, in order to justify and perpetrate wars between peoples. The completely fanciful concept of nuclear wars can therefore no longer be hidden from the peoples. All about this issue will soon be revealed.

You thus know that the appearance of the brown dwarf will herald the end of the Annunaki-Nephilim-Nazi empire, and that an event will soon occur on the planet, leading

some hyperdimensional beings to come out of their underground world, to manifest in the reality of your world. This will be the most important event in the history of modern man.

But be warned, beware of pretenses. Even if many will come with good intentions, some will not be of good intentions! They also have a free will and some very negative STS will not hesitate to transgress it again. STO beings of 4th density will never show themselves openly to the eyes of 3rd density ordinary humans, keep that in mind!
